

DIRECTIONS FOR USE:

Contents settle -- shake well before measurement and use. Measuring cup inside.

Graph-Ex™ may be applied to seed using two methods of application, bulk or planter box.

BULK APPLICATION:

Apply one half ounce (0.5 oz.) Graph-Ex per 50 lbs. of seed, by manually or mechanically introducing it into a flowing stream of seed. Ensure that the Graph-Ex is evenly dispersed in the planter or drill box.

PLANTER BOX APPLICATION:

Apply one half ounce (0.5 oz.) Graph-Ex per 50 lbs. of seed into the planter or drill box. Mix until seed is completely covered. It is best to do mixing in fifty-pound (50 lbs.) increments.

For optimal performance, plant seed within 72 hours of application. **DO NOT EXCEED 72 HOURS** without re-inoculating seed. For current "planting window" recommendations, and the latest seed treatment compatibility information, please contact your ABM representative, go to www.abm1st.com or call ABM at 877-617-2461.

ADVERSE CONDITIONS/VIRGIN SOYBEAN LANDS:

For these situations it is recommended that the application rate be doubled. **NOTE: Re-inoculate any seed not planted with 72 hours of inoculant application to seed. Fungicide or insecticide seed treatments may be harmful to the bacteria. Please contact ABM at 877-617-2461 or www.abm1st.com for details.**

STORAGE INSTRUCTIONS:

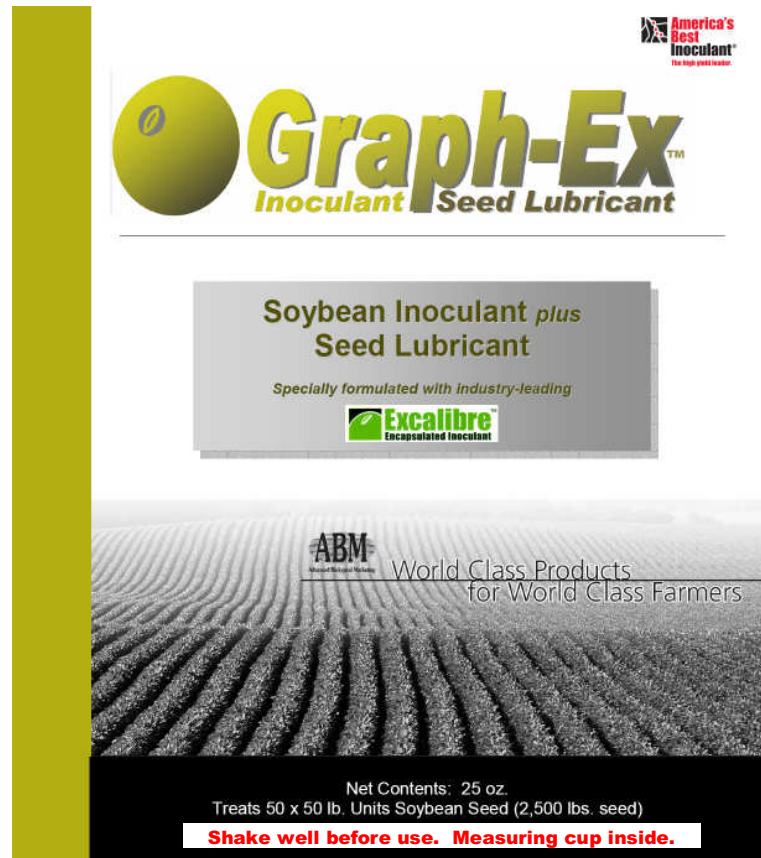

Store package in a cool place, and keep closed until use. Use inoculant before expiration date and only use on specified legume seed. Protect inoculant and inoculated seed from direct sun, hot winds, and high temperatures.

CAUTION!

Avoid exposure to dust. Wear a dust mask to prevent inhalation. Wear gloves and appropriate clothing (long pants and long sleeved shirt) to avoid contact with skin.
