Graph-Ex SA™ for Alfalfa/Clover contains a specially formulated blend of Alfalfa/Clover inoculant plus SabreEx™ Root Inoculant formulated in a talc-graphite carrier.
APPLICATION RATE: 2 oz per 50 lb. of Alfalfa/Clover seed. One 4 oz. package treats 100 lb. of Alfalfa/Clover seed.
PLANTER BOX APPLICATION METHOD: Sprinkle over seed and mix until seed is completely covered. Ensure that the inoculant is evenly dispersed. Larger seed quantities may require a layered application in the planter box. It is best to treat and mix seed in 50 lb. increments. Plant within 72 hours of application. DO NOT EXCEED 72 hours without re-inoculating the seed.
CAUTION: AVOID SKIN CONTACT AND INHALATION; WEAR A DUST MASK TO PREVENT INHALATION, AND APPROPRIATE CLOTHING (LONG PANTS AND LONG SLEEVED SHIRT) TO AVOID CONTACT WITH SKIN.
ADVERSE CONDITIONS and VIRGIN LAND: To maximize yield potential: ABM highly recommends at least a double (2X) inoculant rate when planting under the following soil conditions: 1) Soil that has not hosted the specific legume for more than 3 years 2) soil pH of less than 5.8 or greater than 8.5 3) organic matter less than 1.5% 4) drought or flooding 5) soil temperatures exceeding 80 degrees F 6) eroded soil; or 7) use of soil treatments and chemicals injurious to soil bacteria and inoculants.
STORAGE INSTRUCTIONS: Store package in a cool dry place between 39°F and 77°F. Keep closed until used. Use this product before expiration date and only on specified legume seed. Protect inoculant and inoculated seed from direct sun, hot wind, and high temperature.
